PREFACE

In March, 1955, the first of a new series of Refined Petroleum Products reports was introduced. This new series utilizes data developed from a revised form designed to replace the Refinery Report and the Wholesale Marketing Report forms which had been used up to that time. The effect of the new procedure and an instruction sheet used in connection with the "new" series is reproduced in the March, 1955, bulletin.

During the year it has been necessary to make certain revisions in the monthly figures already published as a result of later information received from the respondent firms. This supplement gives in detail the revised figures for each month starting with March on production, inventories and disposition, including net sales of finished petroleum products. It includes, as well, the complete set of figures for the months of January and February according to the "new" basis which were not previously published. In addition, it gives data for the entire year on crude oil receipts, raw materials supply and imports by provinces as compiled from customs entries by the External Trade Section of the Dominion Bureau of Statistics.

NOTE: It is the practice of the External Trade Section to close off their records for a particular month with entries received at Ottawa on the last working day; accordingly, there may be some carry-over into the next month. That is to say, imports during the last few days of a month at customs' ports such as Halifax, Vancouver, Montreal, etc., do not reach Ottawa in time for inclusion in that month's figures but are carried over into the totals for the following month. Figures shown in Table 3 have been adjusted by examining the individual customs' invoices and by pulling back any such carry-over; Table 3, therefore, shows totals for the full month. For this reason the figures differ slightly from the figures shown in the above table.

NOTE: It is the practice of the External Trade Section to close off their records for a particular month with entries received at Ottawa on the last working day; accordingly, there may be some carry-over into the next month. That is to say, imports during the last few days of a month at customs' ports such as Halifax, Vancouver, Montreal, etc., do not reach Ottawa in time for inclusion in that month's figures but are carried over into the totals for the following month. Figures shown in Table 3 have been adjusted by examining the individual customs' invoices and by pulling back any such carry-over; Table 3, therefore, shows totals for the full month. For this reason the figures differ slightly from the figures shown in the above table.

NOTE: It is the practice of the External Trade Section to close off their records for a particular month with entries received at Ottawa on the last working day; accordingly, there may be some carry-over into the next month. That is to say, imports during the last few days of a month at customs' ports such as Halifax, Vancouver, Montreal, etc., do not reach Ottawa in time for inclusion in that month's figures but are carried over into the totals for the following month. Import figures shown in the Finished Petroleum Products tables throughout this report have been adjusted by examining the individual customs' invoices and by pulling back any such carry-over. For this reason, import figures shown in the Finished Petroleum Products tables throughout this report differ from the figures shown in the above table.

(Special supplement with revised monthly figures; also cumulative figures for the entire year.)

Published by Authority of
The Honourable Gordon Churchill, Minister of Trade and Commerce

6512-528-126

Price $1.00

EDMOND CLOUTIER, C.M.G., O.A., D.S.P., Queen's Printer and Controller of Stationery, Ottawa, 1957.

P R E F A C E

During the year it has been necessary to make certain revisions in the monthly figures already published as a result of later information received from the respondent firms. This supplement gives in detail the revised figures for each month on production, inventories and disposition, including net sales of finished petroleum products, etc. In addition, it gives data for the entire year on crude oil receipts, raw materials supply and imports by provinces as compiled from customs entries by the External Trade Section of the Dominion Bureau of Statistics.

NOTE 1. It is the practice of the External Trade Section to close off their records for a particular month with entries received at Ottawa on the last working day; accordingly, there may be some carry-over into the next month. That is to say, imports during the last few days of a month at customs' ports such as Halifax, Vancouver, Montreal, etc., do not reach Ottawa in time for inclusion in the month's figures but are carried over into the totals for the following month. Figures shown in the tables on Finished Petroleum Products have been adjusted by examining the individual customs' invoices and by pulling back any such carry-over. For this reason the figures differ slightly from the figures shown in the above table.

2. The above procedure applied to the tabulation up to and including April, 1956; after that date, however, due to the lateness of the availability of the import data, this procedure was discontinued and the import figures shown in the tables on Finished Petroleum Products are unadjusted totals based on above table.

3. The External Trade Section makes no distinction in some cases between imports of finished motor gasoline, lube oils and greases and certain kinds of blending stocks. This has resulted in some duplication in the "Net Sales" figures for motor gasoline, lube oils and greases as the amount of blending stock in some cases has been also reported by companies as imports under "Blending stocks used". In order to allow for this duplication, it has been necessary to reduce imports shown in the tables on Finished Petroleum Products for motor gasoline, lube oils and greases.

P R E F A C E

During the year it has been necessary to make certain revisions in the monthly figures already published as a result of later information received from the respondent firms. This supplement gives in detail the revised figures for each month on production, inventories and disposition, including net sales of finished petroleum products, etc. In addition, it gives data for the entire year on crude oil receipts, raw materials supply and imports by provinces as compiled from customs entries by the External Trade Section of the Dominion Bureau of Statistics.

NOTE: The External Trade Section makes no distinction in some cases between imports of finished motor gasoline, lube oils and greases and certain kinds of blending stocks. This has resulted in some duplication in the "Net Sales" figures for motor gasoline, lube oils and greases as the amount of blending stock in some cases has been also reported by companies as imports under "Blending stocks used". In order to allow for this duplication, it has been necessary to reduce imports shown in Table 3 for motor gasoline, lube oils and greases.

Price $1.50

The Queen's Printer and Controller of Stationery, Ottawa, 1959

PREFACE

During the year it has been necessary to make certain revisions in the monthly figures already published as a result of later information received from the respondent firms. This supplement gives in detail the revised figures for each month on production, inventories and disposition, including net sales of finished petroleum products, etc. In addition, it gives data for the entire year on crude oil receipts, raw materials supply and imports by provinces as compiled from customs entries by the External Trade Section of the Dominion Bureau of Statistics.

NOTE: Although details on complete transactions involved, i.e., inventories, disposition etc., are not available, it is estimated that the net sales figures for motor gasoline in British Columbia shown in the following pages are overstated as follows:

	(Bbls)		(Bbls)
January	- Nil	August	- 4,057
February	- 2,971	September	- 3,343

Price $1.50

The Queen's Printer and Controller of Stationery, Ottawa, 1960

PREFACE

During the year it has been necessary to make certain revisions in the monthly figures already published as a result of later information received from the respondent firms. This supplement gives in detail the revised figures for each month on production, inventories and disposition, including net sales of finished petroleum products, etc. In addition, it gives data for the entire year on crude oil receipts, raw materials supply and imports by provinces as compiled from customs entries by the External Trade Section of the Dominion Bureau of Statistics.
